Introduction to Galaxy

Sarai Varona

Unidad de Bioinformática
Unidades Centrales Científico Técnicas – SGAFI-ISCIII

26-30 Octubre 2026, 5ª Edición
Programa Formación Continua, ISCIII

Outline

1. What is Galaxy?
2. Why Galaxy?
3. Why NOT Galaxy?
4. How to use Galaxy?

1. What is Galaxy?

https://galaxyproject.org Galaxy

- **Data Analysis** platform
- Web-based
- **Easy** to use
- **Free** and Open Source
- Many tools (>10,500 Galaxy Tool Shed)
- Popular (>13,000 publications)
- Extensive tutorials available

The Galaxy Community NAR 2024
https://doi.org/10.1093/nar/gkae410

1. What is Galaxy?

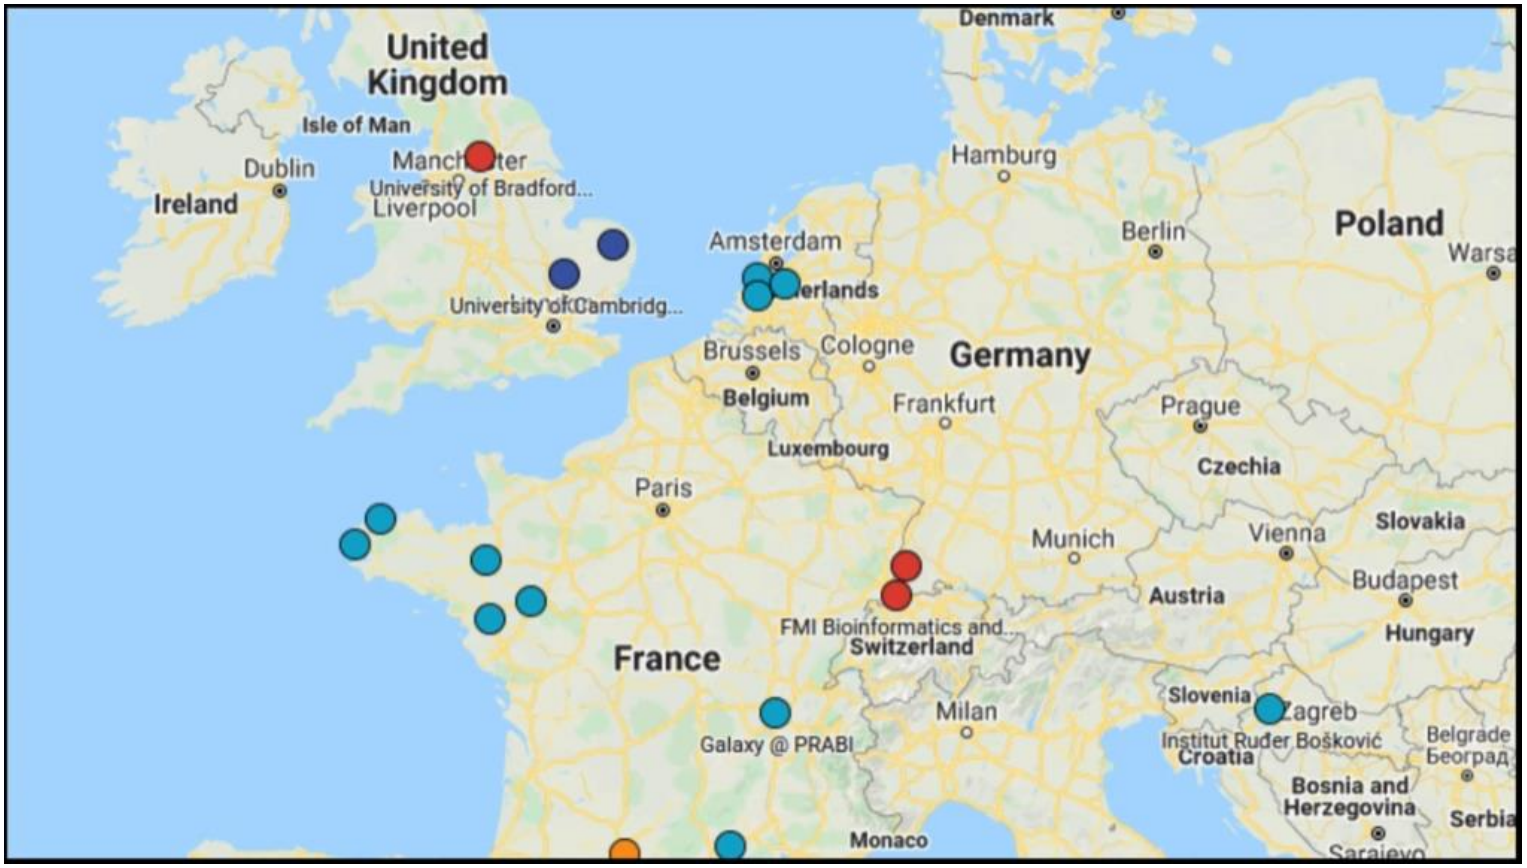

Source: https://training.galaxyproject.org/training-material/topics/introduction/tutorials/galaxy-intro-short/slides.html?utm_source=usegalaxyeu&utm_medium=website&utm_campaign=covid2021#7

Source: https://training.galaxyproject.org/training-material/topics/introduction/tutorials/galaxy-intro-short/slides.html?utm_source=usegalaxyeu&utm_medium=website&utm_campaign=covid2021#7

2. Why Galaxy?

- Easy and accesible:
  - No instalation
  - No commands
- Reproducible
- Versatile workflows
- Open source
- Multidisciplinar

3. Why NOT Galaxy?

	UseGalaxy Servers	Public Servers	TIaaS	Academic Clouds	Commercial Clouds	Containers	VMs	Local
Free to use	Yes	Yes	Yes	Yes[1]	No	Yes	Yes	Yes
Uses your local compute infrastructure	No	No	No	No	No	Yes[2]	Yes[2]	Yes
Datasets total > 250GB (including intermediate)	No	?[5]	Yes	Yes	Yes	Yes[3]	Yes[3]	Yes
Computational requirements are similarly large	No	?[5]	Yes	Yes	Yes	Yes[3]	Yes[3]	Yes
Share Galaxy objects outside your organization	Yes	Yes	Yes	Yes	Yes	Yes[4]	Yes[4]	Yes[5]
Install custom tools and reference genomces	No	No	No	Yes[5]	Yes	Yes	Yes	Yes
Have absolute data security requirements	No	No	No	?[5]	?[5]	?[5]	?[5]	Yes

[1] Depends on provider, and if you are eligible for the service
[2] These technologies can be deployed on clouds or locally.
[3] Depends on the size of the system you are running it on.
[4] With these technologies you can save the server and share the entire platform with them.
[5] Depends on configuration.

Source: https://galaxyproject.org/use/

3. Why NOT Galaxy?

https://usegalaxy.eu/

	UseGalaxy Servers
Free to use	Yes
Uses your local compute infrastructure	No
Datasets total > 250GB (including intermediate)	No
Computational requirements are similarly large	No
Share Galaxy objects outside your organization	Yes
Install custom tools and reference genomces	No
Have absolute data security requirements	No

3. Why NOT Galaxy?

https://usegalaxy.eu/

	UseGalaxy Servers
Free to use	Yes
Uses your local compute infrastructure	No
Datasets total > 250GB (including intermediate)	No
Computational requirements are similarly large	No
Share Galaxy objects outside your organization	Yes
Install custom tools and reference genomces	No
Have absolute data security requirements	No

3. Why NOT Galaxy?

https://usegalaxy.eu/

	UseGalaxy Servers

4. How to use Galaxy?

4.1. Data

Loading in data from your machine or via URL.

Importing via Data Uploader

Use data from sources such as UCSC, SRA, or EMBL.

Retrieving Data from Public Databases

Find and retrieve data shared between Galaxy users.

Obtaining Shared Data

Observing and modifying your data

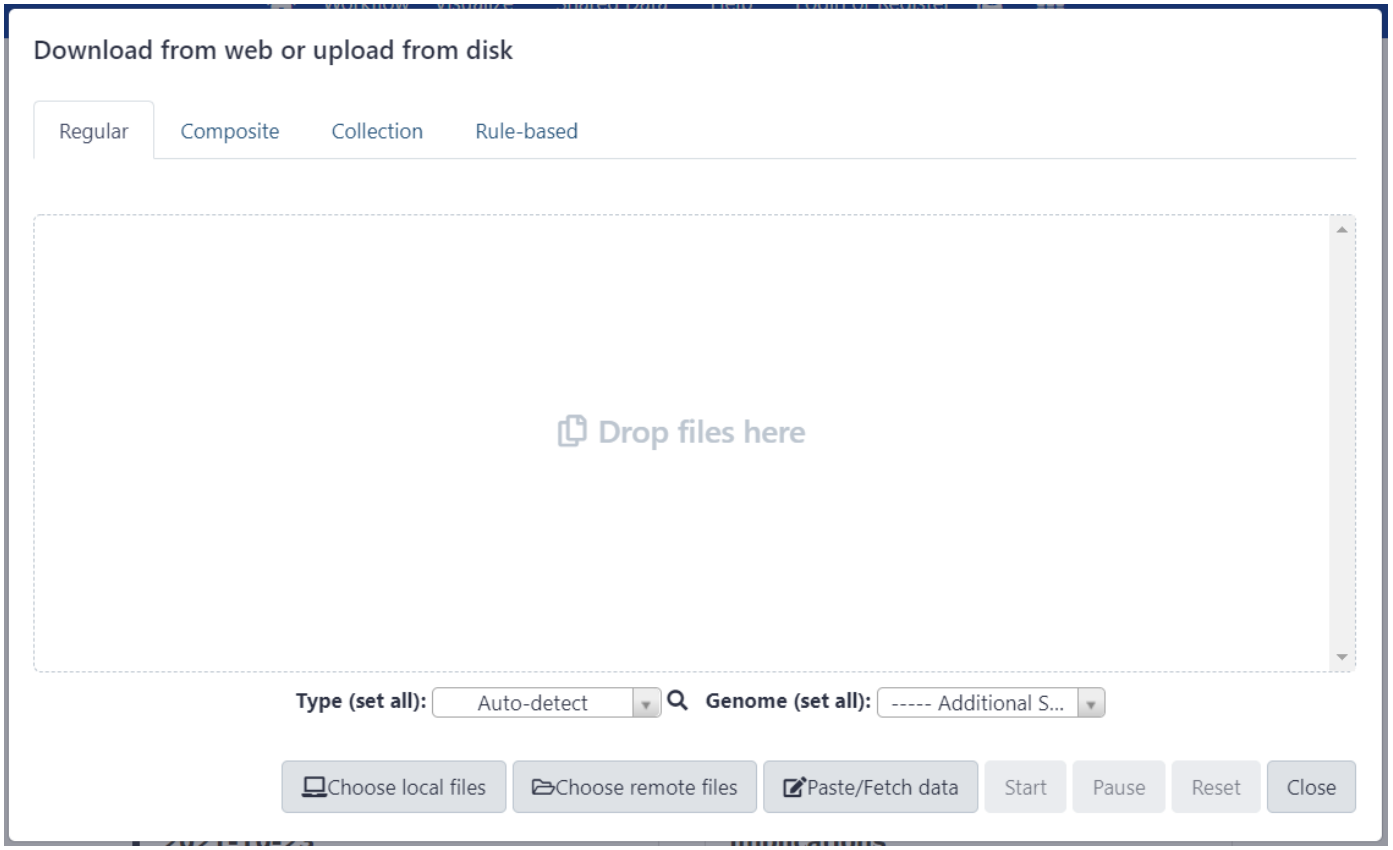

Data and Metadata in Galaxy.

COVID-19 Research!
Want to learn the best practices for the analysis of SARS-CoV-2 data using Galaxy? Visit the Galaxy SARS-CoV-2 portal. We mirror all public SARS-CoV-2 data from ENA in a Galaxy data library for your convenience. The Galaxy community has created COVID-19 dedicated training materials. Please check our recent activities for more details.
If you need help submitting your data to public archives, like ENA, please get in touch. We will support you in sharing your data.
"Anyone, anywhere in the world should have free, unhindered access to not just my research, but to the research of every great and enquiring mind across the spectrum of human understanding." – Prof. Stephen Hawking

FastQC Read Quality reports (Galaxy Version 0.73+galaxy0)
Favorite
Versions
Options
Raw read data from your current history
2: CA-CDPH-MC2335856_R1.fastq.gz
Contaminant list
No tabular dataset available.
tab delimited file with 2 columns: name and sequence. For example: Illumina Small RNA RT Primer CAAGCAGAAGACGGCATACGA
Adapter list
No tabular dataset available.
List of adapters adapter sequences which will be explicity searched against the library. It should be a tab-delimited file with 2 columns: name and sequence. (--adapters)
Submodule and Limit specifing file
Nothing selected
a file that specifies which submodules are to be executed (default=all) and also specifies the thresholds for the each submodules warning parameter
Disable grouping of bases for reads >50bp
No
Using this option will cause fastqc to crash and burn if you use it on really long reads, and your plots may end up a ridiculous size. You have been warned! (--nogroup)
Lower limit on the length of the sequence to be shown in the report
As long as you set this to a value greater or equal to your longest read length then this will be the sequence length used to create your read groups.

Combine FASTA and QUAL into FASTQ
fastp - fast all-in-one preprocessing for FASTQ files
Map with PerM for SOLiD and Illumina
Manipulate FASTQ reads on various attributes
Create a model to recommend tools using deep learning
FLUJOS DE TRABAJO
All workflows
FastQC Read Quality reports (Galaxy Version 0.73+galaxy0)
Favorite
Versions
Options
Raw read data from your current history
2: CA-CDPH-MC2335856_R1.fastq.gz
Contaminant list
No tabular dataset available.
tab delimited file with 2 columns: name and sequence. For example: Illumina Small RNA RT Primer CAAGCAGAAGACGGCATACGA
Adapter list
No tabular dataset available.
List of adapters adapter sequences which will be explicity searched against the library. It should be a tab-delimited file with 2 columns: name and sequence. (--adapters)
Submodule and Limit specifing file
Nothing selected
a file that specifies which submodules are to be executed (default=all) and also specifies the thresholds for the each submodules warning parameter
Disable grouping of bases for reads >50bp
No
Using this option will cause fastqc to crash and burn if you use it on really long reads, and your plots may end up a ridiculous size. You have been warned! (--nogroup)
Lower limit on the length of the sequence to be shown in the report
As long as you set this to a value greater or equal to your longest read length then this will be the sequence length used to create your read groups.

Purpose
FastQC aims to provide a simple way to do some quality control checks on raw sequence data coming from high throughput sequencing pipelines. It provides a set of analyses which you can use to get a quick impression of whether your data has any problems of which you should be aware before doing any further analysis.
The main functions of FastQC are:
Import of data from BAM, SAM or FastQ/FastQ.gz files (any variant),
Providing a quick overview to tell you in which areas there may be problems
Summary graphs and tables to quickly assess your data
Export of results to an HTML based permanent report
Offline operation to allow automated generation of reports without running the interactive application
FastQC
This is a Galaxy wrapper. It merely exposes the external package FastQC which is documented at FastQC Kindly acknowledge it as well as this tool if you use it. FastQC incorporates the Picard-tools libraries for SAM/BAM processing.
The contaminants file parameter was borrowed from the independently developed fastqcwrapper contributed to the Galaxy Community Tool Shed by J. Johnson. Adaption to version 0.11.2 by T. McGowan.
Inputs and outputs
FastQC is the best place to look for documentation - it's very good. A summary follows below for those in a tearing hurry.
This wrapper will accept a Galaxy fastq, fastq.gz, sam or bam as the input read file to check. It will also take an optional file containing a list of contaminants information, in the form of a tab-delimited file with 2 columns, name and sequence. As another option the tool takes a custom limits.txt file that allows setting the warning thresholds for the different modules and also specifies which modules to include in the output.

FLUJOS DE TRABAJO
All workflows
Executed FastQC and successfully added 2 jobs to the queue.
The tool uses 2 inputs:
1: CA-CDPH-MC2335856_R2.fastq.gz
2: CA-CDPH-MC2335856_R1.fastq.gz
It produces 4 outputs:
3: FastQC on data 1: Webpage
4: FastQC on data 1: RawData
5: FastQC on data 2: Webpage
6: FastQC on data 2: RawData
You can check the status of queued jobs and view the resulting data by refreshing the History panel. When the job has been run the status will change from 'running' to 'finished' if completed successfully or 'error' if problems were encountered.
Tool recommendation
You have used fastqc tool. For further analysis, you could try using the following/recommended tools. The recommended tools are shown in the decreasing order of their scores predicted using machine learning analysis on workflows. Therefore, tools at the top may be more useful than the ones at the bottom. Please click on one of the following/recommended tools to open its definition.

COVID-19 Research!
Want to learn the best practices for the analysis of SARS-CoV-2 data using Galaxy? Visit the Galaxy SARS-CoV-2 portal. We mirror all public SARS-CoV-2 data from ENA in a Galaxy data library for your convenience. The Galaxy community has created COVID-19 dedicated training materials. Please check our recent activities for more details.
If you need help submitting your data to public archives, like ENA, please get in touch. We will support you in sharing your data.
"Anyone, anywhere in the world should have free, unhindered access to not just my research, but to the research of every great and enquiring mind across the spectrum of human understanding." – Prof. Stephen Hawking

This workflow is currently restricted so that only you and the users listed below can access it.
Make Workflow Accessible via Link
Generates a web link that you can share with other people so that they can view and import the workflow.
Make Workflow Accessible and Publish
Makes the workflow accessible via link (see above) and publishes the workflow to Galaxy's Published Workflows section, where it is publicly listed and searchable.
You have not shared this workflow with any users yet.
Share with a user
Export
Download
workflow as a file so that it can be saved or imported into another Galaxy server.
This workflow must be accessible. Please use the option above to "Make Workflow Accessible and Publish" before receiving a URL for importing to another Galaxy.
