

Introduction to Galaxy

Isabel Cuesta

Unidad de Bioinformática

Unidades Centrales Científico Técnicas – SGAFI-ISCIII

3-7 Noviembre 2025, 4ª Edición

Programa Formación Continua, ISCIII

Outline

1. What is Galaxy?
2. Why Galaxy?
3. Why NOT Galaxy?
4. How to use Galaxy?

1. What is Galaxy?

<https://galaxyproject.org>  **Galaxy**

- **Data Analysis** platform
- Web-based
- **Easy** to use
- **Free** and Open Source
- Many tools (**>10,500** [Galaxy Tool Shed](#))
- Popular (**>13,000** [publications](#))
- Extensive [tutorials](#) available

 **Galaxy** platform 2024

Accessible, reproducible, and collaborative data analyses

 Monthly	>11 k users >1 m jobs		Resourced with:
	>400 supported data types		 >9 k tools  Unlimited workflows  >400 tutorials

Open source | Vibrant global community | Multidisciplinary

The Galaxy Community NAR 2024
<https://doi.org/10.1093/nar/gkae410>

1. What is Galaxy?

Source: https://training.galaxyproject.org/training-material/topics/introduction/tutorials/galaxy-intro-short/slides.html?utm_source=usegalaxyeu&utm_medium=website&utm_campaign=covid2021#7

1. What is Galaxy?

Source: https://training.galaxyproject.org/training-material/topics/introduction/tutorials/galaxy-intro-short/slides.html?utm_source=usegalaxyeu&utm_medium=website&utm_campaign=covid2021#7

1. What is Galaxy?

Source: https://training.galaxyproject.org/training-material/topics/introduction/tutorials/galaxy-intro-short/slides.html?utm_source=usegalaxyeu&utm_medium=website&utm_campaign=covid2021#7

1. What is Galaxy?

Source: https://training.galaxyproject.org/training-material/topics/introduction/tutorials/galaxy-intro-short/slides.html?utm_source=usegalaxyeu&utm_medium=website&utm_campaign=covid2021#7

2. Why Galaxy?

- Easy and accesible:
 - No instalation
 - No commands
- Reproducible
- Vrsatile workflows
- Open source
- Multidisciplinar

The screenshot displays the Galaxy web interface. On the left, a 'Tools' sidebar lists various bioinformatics tools under categories like 'Get Data', 'Text Manipulation', and 'Statistics'. The main panel shows the 'Edit Attributes' tool configuration, where the 'Name' is 'Join two Queries on data 3 and data 1'. Below this, there's a 'Change data type' section with 'New Type' set to 'tabular'. On the right, a 'History' sidebar shows a list of previous jobs, including '14: Draw phylogeny on data 12', '13: Draw phylogeny on data 11', and others, each with a status icon and a link to view details.

3. Why NOT Galaxy?

	UseGalaxy Servers	Public Servers	TlaaS	Academic Clouds	Commercial Clouds	Containers	VMs	Local
Free to use	Yes	Yes	Yes	Yes ¹	No	Yes	Yes	Yes
Uses your local compute infrastructure	No	No	No	No	No	Yes ²	Yes ²	Yes
Datasets total > 250GB (including intermediate)	No	? ⁵	Yes	Yes	Yes	Yes ³	Yes ³	Yes
Computational requirements are similarly large	No	? ⁵	Yes	Yes	Yes	Yes ³	Yes ³	Yes
Share Galaxy objects outside your organization	Yes	Yes	Yes	Yes	Yes	Yes ⁴	Yes ⁴	Yes ⁵
Install custom tools and reference genomes	No	No	No	Yes ⁵	Yes	Yes	Yes	Yes
Have absolute data security requirements	No	No	No	? ⁵	? ⁵	? ⁵	? ⁵	Yes

¹ Depends on provider, and if you are eligible for the service

² These technologies can be deployed on clouds or locally.

³ Depends on the size of the system you are running it on.

⁴ With these technologies you can save the server and share the entire platform with them.

⁵ Depends on configuration.

Source: <https://galaxyproject.org/use/>

3. Why NOT Galaxy?

<https://usegalaxy.eu/>

	UseGalaxy Servers
Free to use	Yes
Uses your local compute infrastructure	No

4. How to use Galaxy?

<https://usegalaxy.eu/>

The screenshot displays the Galaxy Europe web interface. The top navigation bar includes the Galaxy logo, the word "Europe", and user options like "Using 0 b" and "Login or Register". A left sidebar lists tool categories: Upload, Tools, Workflows, Visualization, Histories, and Pages. Under "Tools", sub-categories include "GENERAL TEXT TOOLS" (Text Manipulation, Convert Formats, Filter and Sort, Join, Subtract and Group) and "GENOMIC FILE MANIPULATION" (Convert Formats, FASTA/FASTQ, Quality Control, SAM/BAM, BED, VCF/BCF, Nanopore). The main content area features a large banner for the "Galaxy Training Network" with the text "Learn Galaxy with" and a quote from Prof. Stephen Hawking. Below the banner are sections for "News" and "Events". The "News" section lists articles such as "Downloading data from NCBI SRA", "Why collections?", "New Galaxy Tool: BiaPy – Deep Learning for Bioimage Analysis in Galaxy", "Exploring Microbial Dark Matter: Outcomes of the FAIRyMAGs Hackathon 2025", and "From Functional Nucleic Acids to Galaxy Training: Reflections on My Research Stay in Freiburg". The "Events" section lists upcoming events like "Oct 28 - Oct 30 Science Gateways 2025", "Nov 4 Single-cell & sPatial Omics Community Meeting: SPOC", "Nov 5 - Nov 8 Genome Informatics", "Nov 13 Galaxy Community Board Meeting: GCB", and "Nov 20 Small Scale Galaxy Admins Meeting". A right-hand panel shows a "History" section with a search bar and a message stating "This history is empty. Puedes cargar tus propios datos u obtenerlos de una fuente externa."

FastQC Read Quality reports (Galaxy Version 0.73+galaxy0)

Favorite

Versions

Options

Raw read data from your current history

2: CA-CDPH-MC2335856_R1.fastq.gz

Contaminant list

No tabular dataset available.

tab delimited file with 2 columns: name and sequence. For example: Illumina Small RNA RT Primer CAAGCAGAAGACGGCATACGA

Adapter list

No tabular dataset available.

List of adapters adapter sequences which will be explicitly searched against the library. It should be a tab-delimited file with 2 columns: name and sequence. (--adapters)

Submodule and Limit specifying file

Nothing selected

a file that specifies which submodules are to be executed (default=all) and also specifies the thresholds for the each submodules warning parameter

Disable grouping of bases for reads > 50bp

No

Using this option will cause fastqc to crash and burn if you use it on really long reads, and your plots may end up a ridiculous size. You have been warned! (--nogroup)

Lower limit on the length of the sequence to be shown in the report

As long as you set this to a value greater or equal to your longest read length then this will be the sequence length used to create your read groups.

Purpose

FastQC aims to provide a simple way to do some quality control checks on raw sequence data coming from high throughput sequencing pipelines. It provides a set of analyses which you can use to get a quick impression of whether your data has any problems of which you should be aware before doing any further analysis.

The main functions of FastQC are:

- Import of data from BAM, SAM or FastQ/FastQ.gz files (any variant),
- Providing a quick overview to tell you in which areas there may be problems
- Summary graphs and tables to quickly assess your data
- Export of results to an HTML based permanent report
- Offline operation to allow automated generation of reports without running the interactive application

FastQC

This is a Galaxy wrapper. It merely exposes the external package FastQC which is documented at [FastQC](#) Kindly acknowledge it as well as this tool if you use it. FastQC incorporates the Picard-tools libraries for SAM/BAM processing.

The contaminants file parameter was borrowed from the independently developed fastqcwrapper contributed to the Galaxy Community Tool Shed by J. Johnson. Adaption to version 0.11.2 by T. McGowan.

Inputs and outputs

FastQC is the best place to look for documentation - it's very good. A summary follows below for those in a tearing hurry.

This wrapper will accept a Galaxy fastq, fastq.gz, sam or bam as the input read file to check. It will also take an optional file containing a list of contaminants information, in the form of a tab-delimited file with 2 columns, name and sequence. As another option the tool takes a custom limits.txt file that allows setting the warning thresholds for the different modules and also specifies which modules to include in the output.

The tool produces a basic text and a HTML output file that contain all of the results including the following:

Workflow ' FastQC'

Share

This workflow is currently restricted so that only you and the users listed below can access it.

Make Workflow Accessible via Link

Generates a web link that you can share with other people so that they can view and import the workflow.

Make Workflow Accessible and Publish

Makes the workflow accessible via link (see above) and publishes the workflow to Galaxy's Published Workflows section, where it is publicly listed and searchable.

You have not shared this workflow with any users yet.

Share with a user

Export

Download

 workflow as a file so that it can be saved or imported into another Galaxy server.

This workflow must be accessible. Please use the option above to "Make Workflow Accessible and Publish" before receiving a URL for importing to another Galaxy.
